

Quarterly Factsheet for the quarter ending 31 December 2025

Fund description

The Evidential Sustainable Targeted Factor Fund (Fund) invests in a diversified portfolio of small and medium capitalisation companies associated with global developed markets (excluding Australia and New Zealand), with an emphasis on companies that are expected to have higher returns. The Fund also takes into account certain environmental and social considerations. The Fund's currency position is unhedged.

The Fund follows an evidence-based investment philosophy that is grounded in economic theory and backed by academic research. The Fund targets the following sources of higher expected returns that have been identified.

- The overall market - shares have higher expected returns than bonds.
- Company size - small company shares have higher expected returns than large company shares.

- Relative price - low relative price or 'value' shares have higher expected returns than high relative price shares.
- Profitability - shares with higher profitability have higher expected returns than shares with lower profitability.

Fund objective

The objective of the Fund is to provide capital growth over the minimum recommended investment timeframe of 7 years. The objective is managed within portfolio constraints, including geographic exposure, market capitalisation, diversification, and environmental and social considerations.

The Fund is not managed with the objective of achieving a particular return relative to a benchmark index. However, the benchmark index against which Fund returns will be reported against is the MSCI World SMID Index (NZD, gross return).
